FOR IMMEDIATE RELEASE

**ANTHONY PATELLA JOINS CUOL AS DIRECTOR OF DATA CENTER
OPERATIONS**

WALTHAM, MA, September 9, 2008 – Credit Union On-Line, Inc. (CUOL), the country's only data center provider of FiServ's XP2 platform, announced today that Anthony (Tony) Patella has joined the organization as Director of Data Center Operations. CUOL welcomes Tony as the company expands to accommodate its growing customer base.

Tony comes to CUOL by way of Tampa, Florida and brings a tremendous amount of experience in project design and management, team building, crisis management, organizational and time management, and analytical skills and problem resolution. He will work directly with CUOL's Chief Operating Officer Barbra Lowman and is charged with planning, directing, organizing, and managing the Data Center. He will also play an integral role in formulating and administering organizational plans and policies, including budgets and long range strategic goals and initiatives. Additionally, Tony will oversee the installation of new XP2 applications and operating system software, and will provide guidance on the day-to-day operation of the data center and any system upgrades.

"Tony's commitment to quality control and overall excellence will help CUOL continue to raise the bar for service level standards," said Lowman. "He is dedicated to customer service, and supports CUOL's emphasis on providing the highest possible level of service to our credit union clients. We look forward to leveraging Tony's industry experience and are excited to have him on our team."

Prior to CUOL, Tony held positions in both the financial services and data processing/service bureau industries. Most recently, Tony served as a Personal Banker for Bank of America Corporation, where he was recognized for his leadership capabilities and his strength in mentoring and training, as well as for implementing successful strategic plans for small businesses, and building strong, profitable relationships with clients. Tony also held positions at Lanier Worldwide, Inc., COMTEK, and NCR Corp/AT&T Business Services.

In addition to bringing Tony on board, CUOL is continuing its ongoing effort to enhance security services and has created a new Network Security Administrator position within the Information Security department. Additionally, CUOL has shifted positions within the organization to allow for a staff member entirely dedicated to network security. These changes will enable CUOL to implement and support a number of new security initiatives the organization has identified through its strategic planning and compliance efforts.

About Credit Union On-Line, Inc.:

Credit Union On-Line, Inc. (CUOL) has been providing data processing solutions for credit unions since 1980, and is the only complete technology solutions provider in the U.S. that offers FiServ's XP2 platform in a data center environment. Based in Waltham, MA, CUOL integrates XP's core data processing applications, built on a centralized and open DB2 database, with key features, including: online banking; voice response with voice recognition; a general ledger/accounting products suite, including ALM; e-statements; consumer and mortgage loan origination; electronic member identification; a robust collections application; and commercial deposit accounts and lending. CUOL also assists its credit union clients with their disaster recovery, regulatory compliance regarding the Gramm-Leach-Bliley Act (GLBA), and business resumption efforts. CUOL is a national provider of XP data processing services, and ranks the 23rd largest Credit Union Service Organization, according to *Credit Union Times*.
